Introduction

Hello, I am a software developer who first started coding for others in 2018. Starting with static websites, I went on to maintain and develop a variety of softwares, such as legacy codebases, proofs-of-concepts, SPAs, native apps and more. I advocate for documentation, reducing technical debt and staying cognizant of industry tools, trends and demands.

Experience

Revature: *2019 - Present*

- Underwent a 3-month boot camp emphasizing enterprise web development with microservices, single-page applications, CI/CD principals and cloud computing
- Created and delivered 2 proofs-of-concepts with 2 different teams
- Provided debugging and coding aid to interns working on an internal project
- Added UI features to a legacy application that serves millions of users worldwide
- Personally interviewed and evaluated 200+ engineering candidates

Other:

- Product design, web, native and cloud-function programming; graphic design
- Proof-of-Concept development, static website design and development

What I Bring

Top Languages, Frameworks and Tools: *TypeScript, NodeJS, Java EE, Spring Cloud, ExpressJS, React, Angular, React Native, Flutter, Google Firebase, MongoDB*
Relevant Skills: *Web/graphic design, test-driven development, version control*

Education and Certification

AWS Certified Developer Associate, received August 28, 2020, good for 3 years
